

Data usage by the third sector - immigration and migration data

EMAIL SUBJECT Do you use DATA?

The following page contains the text of the emails which will be sent to potential respondents asking them to complete the survey. The first is for charities and non-academic respondents, the second is for academic respondent.

Does your organisation use data? If so, we want to hear from you!

[survey link]

I am a researcher from the University of Stirling looking into how organisations use data in any capacity.

If your organisation uses any of the following in any way please read on.

Scottish Government data, Home Office, National Records of Scotland, UK Data Archive.

Annual Population Survey, International Passenger Survey, Community Health Index, Labour Force Survey, Census.

This survey asks about your organisation's use of immigration and migration data and should be answered by an **analyst, researcher, senior management, or anyone else with knowledge of how data is used within your organisation.**

Regards,

Tom Wallace

P.S. the survey should only take 10 minutes to fill in, your responses will help immensely. Please consider taking part.

Welcome

Thank you for taking part in this survey. Your responses will help us better understand how researchers interact with data sources and help build up a visual map of the flow of data through organisations and individual researchers.

The survey comprises 3 sections as below and should take ~10 minutes to complete;

- Where you source data from and how data is shared between you and other organisations
- Your/your organisation's capacities to engage with government data
- Difficulties in engaging with this data

The survey requires information such as your name and email address but this information will be treated with great care to ensure it remains confidential and anonymous. Neither of these will be published in any way during the research. The final results will comprise organisation's names but individuals will not be identifiable. A fully anonymised version of the data drawn from this survey will be lodged with the UK Data Archive in accordance with ESRC Research Data Policy (ESRC 2014).

Your participation in this survey is completely voluntary; you may stop at any time and any answers you have given up to that point will be discarded. During the survey you will be offered the chance to opt-in to a round of follow up interview. If you opt-in to this you may be contacted by the researcher about a follow up interview.

Your participation in this survey should help develop a better understanding of users' use of government data and help create a network map of data users in your field.

This project is jointly funded by the Economic and Social Research Council and the Scottish Government. If you have any questions about this survey or the research project overall please contact Tom Wallace – tom.wallace@stir.ac.uk

Or contact my supervisor – Alasdair Rutherford - alasdair.rutherford@stir.ac.uk | Phone: 01786 466409

Sources and networking

The following 4 questions will be used to build a map of the flow of data on the third sector through organisations. Organisation's names will be shown on this map but individuals will be anonymised. Other organisations you mention may be contacted by the research team to take part in this survey (so we can see where the data flows to) but they will not know you have suggested them.

For each data set and source you said you or your organisation uses (or any others not mentioned) could you name the data and, if possible, provide a link to where you get the data from? For example: 'British household panel survey - <http://discover.ukdataservice.ac.uk/series/?sn=200005>'

[+ More info](#)

If you share any of this data with any other organisation or person could you name them and provide a link or email address for them along with which data you share? For example: 'Example Charity Scotland - <http://www.examplescot.org> - Scottish Household Survey' or 'John Smith - j.smith@examplescot.org - charities register'

[+ More info](#)

If you republish any of the data listed above, or any findings stemming from any of this data (for example, showing some findings on your website or in an academic journal) could you say which and provide a link or details as to where?

[+ More info](#)

If you represent an organisation which produces one (or more) of the sets listed above could you please specify which?

[+ More info](#)

Lastly, some details about you

The following information will be used for record keeping and will not be published at any point throughout the research. Your personal details will be securely protected and kept confidential.

What is your title?

- ☐ Mr
- ☐ Mrs
- ☐ Miss
- ☐ Ms
- ☐ Dr
- ☐ Other

If you selected Other, please specify:

What is your first name?

What is your last name?

What is your email address? (your work or organisational email is preferred) * Required

Please enter a valid email address.

We would like to contact some respondents for a follow up interview exploring further some of the same issues raised in this survey. Would you like to be considered?

- ☐ Yes
- ☐ No

If you selected yes could you provide an email address to contact you (if it is different from the one you previously supplied)

Please enter a valid email address.

Could you name and provide the contact details (email address) for anyone (or any organisation) who you think may be interested in responding to this survey? This person may be contacted to invite them the complete the survey. They will not know you have recommended them.

End

Thank you for participating in this survey.

The information you have provided will remain confidential; the survey responses will not be shared with any other parties. The published results of the survey will not contain your name or any other individual information by which you could be identified. The data mapping results will include your organisation's name and your position but this will only show how organisations link together and will not be linked to any other information shared during the survey. Your information will be kept on a secure and encrypted network and will be destroyed once the project, and any publications, are complete. The information will not be used for any purpose other than this project and any further publications.
